

For SugarCRM and QuickBooks®

Product Overview

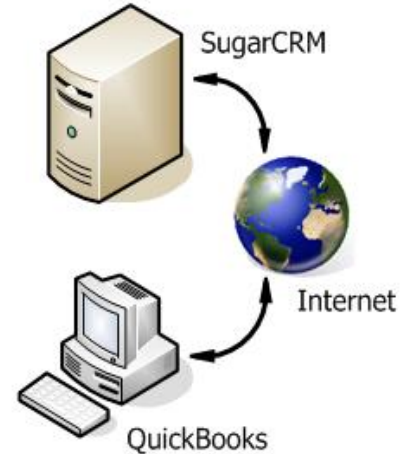

RPS Technology's QConnector™ is a complete business solution providing comprehensive synchronization and integration between SugarCRM and Intuit's QuickBooks® business accounting software.

Key Features and Benefits

Having a single, coordinated data management system for customer information gives both sales and accounting an advantage by having a complete view of their customer database from within SugarCRM. Through bi-directionally connecting SugarCRM with QuickBooks, QConnector allows you to:

- Synchronize account, invoice, payment, and product data.
- Save time and effort by preventing duplicate customer/account data.
- Track sales and accounting data to ensure proper reporting.
- Increase receivables by instantly checking customer payment status.
- Track inventory from SugarCRM products catalog and update in QuickBooks.

Internet Communication Path

QConnector Information Flow

Sugar Professional / Enterprise	QuickBooks
Accounts	Customers
Product Catalog	Products (Items)
Shippers	Ship Via
Tax Rates	Sales Tax Items
Quotes	Invoices
Sugar Community Edition	QuickBooks
Accounts	Customers
